WALTHAM WATCHES.

WALTHAM Watches!

More than 450.000 Watches are now speaking for the

es prices in greenbacks than the gold price efore the war. There is no other manufac irse of any kind in the United States of which its can be said. this can be said.

These time-pieces combine every improvement that a long experience has proved o real practical use. Having had the refusa of nearly every invention in watchmaking originating in this country or in Europe, only those were finally adopted which severe testing by the most skillful artisans in our works and long use on the part of the public demonstrated to be essential to correct and enduring time-keeping.

Among the many improvements we would particularize;

Among the many improvements we would particularize;

The invention and use of a centre-pinion of peculiar construction, to prevent damage to the train by the breakage of main aprings, is original with the American Watch Company who, having had the refusal of all other contrivances, adopted Fogg's Patent pinion aboing the best and faultiess.

Hardened and tempered hair springs, now universally admitted by watchmakers to be the best, are used in all grades of Waltham Watches. All Waitham Watches have dust-proof caps, protecting the movement from dust and lessening the necessity of the frequent cleaning necessary in other watches. Our, new patent stem-winder, or keyless watch, is air-easy a decided success and a great improvement on any stem-winding watch in the American market, and by far the cheapest watch of its quality now offered to the public. To those living in portions of the United States where watchmakers do not abdund, watches with the above-mentioned improvements, which tend to incure accuracy, cleanliness, durability and convenience, must prove invaluable.

Every watch guaranteed by the Company.
